Subject: BRC: Stop making radwaste; start taking scientifically-sound decisions

Dear Commission members

As you know, there is no way to safely make, ship or store radioactive waste. So let's stop making it.

It's time to move on to clean energy and into a future that our children will be proud and grateful for. It's been a long time coming. Years and years since we stood hand-in-hand at the WIPP site and listened to Indian prayers. We won't give up and go away. It's this beautiful and sacred life we are fighting for.

Thank you,

Phaedra Greenwood
